

silent party

SilentParty is an edgy new concept in corporate and social gatherings allowing your guests to experience the party scene in a way that they never have before! Music is transmitted through a wireless headset, creating a distinct party atmosphere for your guest while maintaining a true SILENT event that doesn't disturb neighbors in your residential neighborhood or workspace.

Step One: Pick Number of DJs

(2 hour minimum on all packages)

- 1 DJ - Channel A
- 2 Djs - Channel A&B
(2nd DJ can be a different style than the first)

Step Two : Number of Headsets

- 100-300 Headsets
(100 minimum)
- 300 + Headsets

Every party member is given their own headphones and are able to take control of their own listening experience - switching between the two channels that the DJs transmit on and controlling their own volume! When the individual is done they simply return them to the headphone assistant at the exit.

Great for College Events, Bowling Alleys, Sporting Events, Corporate Events & More!
